BULLETIN (12-15)

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 78 pages. Original publisher: Washington: U. S. G. P. O. : For sale by the Supt. of Docs. , U. S. G. P. O. , 2007. LC Number: KF26 . E55 2007p OCLC Number: (OCoLC)162039196 Subject: Geological carbon sequestration -- Law and legislation -- United States. Excerpt: . . . 11 DOE S CARBON SEQUESTRATION PROGRAM The Carbon Sequestration Program, with a Fiscal Year 2008 budget request of 86 million (including Sequestration R and D by federal employees under the Program Direction line), encompasses two main elements of technology development for geo-logic sequestration: Core R and D and Validation and Deployment. The Core R and D element converts technology needs in several focus areas into technology solutions that can then be validated and deployed in the field. Lessons learned from the field tests are fed back to the Core R and D element to guide future research and development. Through its Integrated Gasification Combined Cycle, Fuels, Sequestration, and Ad-vanced Research programs, DOE is investigating a wide variety of separation tech-niques, including gas phase separation, absorption, and adsorption, as well as hy-brid processes, such as adsorption membrane systems. Current efforts cover not only improvements to state-of-the-art technologies but also the development of several revolutionary concepts, such as metal organic frameworks, ionic liquids, and enzyme based systems. The ultimate goal is to drive down the energy penalty associated with capture so that geologic sequestration can be done while keeping any increase in the cost of electricity to less than 10 percent. REGIONAL CARBON SEQUESTRATION PARTNERSHIPS One of the key questions regarding geologic sequestration is the ability to store CO in underground formations with long-term stability (permanence); this requires 2 monitoring and verification of the fate of...
