

The Practical Surveyor, Containing the Most Approved Methods for Surveying of Lands and Waters, by the Several Instruments Now in Use; Particularly Exemplified with the Common and New Theodolites, and Also How to

By John Hammond

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1765 Excerpt: .till the length each way be at least equal to the Radius of the Protractor. Then I place the center of the Protractor on C, and because the degrees of the angle at C are less than 180, I lay the beginning of the degrees of the Protractor towards B, the last station, and the diameter on BC. Then close to the edge of the Protractor, with my Protracting Pin, I make a mark against 143 45 ; the quantity of the angle at C, and to it draw an obscure right line from C, representing the line from C to D. Then turn the Protractor about, its center still coinciding with C, because the bearing is more than 180, the beginning of the degrees towards S, and the diameter parallel to the meridians; and then if you have work-ed truly, the line CD before drawn,...
