Excerpt: . PITCHING Pitching is the most highly developed, most skillful and most important part of baseball, requiring more thought, more strength and more brains than any other position demands. Good pitching is the absolute essential to victory, and, considered in relation to the inside game, is vital, for unless the pitcher understands every move of his fellow players, and adjusts his pitching to the plan, the inside game becomes worse than useless. The development of the science of pitching has, from the inception of the game, been in advance of the development of the other departments of play and to such an extent that the rule makers from the first have found it necessary to legislate to handicap the pitcher to prevent him from becoming absolute master of the game. In spite of the rules the pitchers have by persistent work and thought kept...
