

Sailing Into Cosmic Destinations. Notes on the Mechanics and Thermodynamics of Novel Relativistic Sail Space Craft. Volume 2. (Paperback)

By James M Essig

Createspace, United States, 2014. Paperback. Book Condition: New. 279 x 216 mm. Language: English . Brand New Book ***** Print on Demand *****.This is the second of an ongoing series notes on the subject of novel polymode relativistic propulsion methods. The author has many additional thoughts and formulations to express on this subject. It is hoped that the careful or even casual reader of this book will be interested in the series of books yet to be published. The contents of this book include explicit and detailed expressions along with simple abstractive functional notation. The long-form expressions include numerical analysis type computational algorithms from which computer programs can be easily derived by those skilled in current art code writing for physics simulations. In this book, I present additional propulsion modes that are not covered in Volume 1. These are the: teleported energy mode, Standard Model and Mirror Matter Model cosmic neutrino background sail mode, Standard Model and Mirror Matter Model Magnetic field propeller mode, plug-In power mode, stepwise teleporting mode, inertial mass reduction mode, time crystal motivated rotational motion augmented mode, and mass-driver tube-based gamma factor enhancement mode. These additional modes are applicable for both the Light- String Sails and...

Reviews

A fresh e book with a new viewpoint. It is among the most awesome ebook we have read through. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- **Prof. Christelle Stark III**

This publication is fantastic. It really is full of knowledge and wisdom You are going to like just how the author write this publication.
