Starting out as a photographer in the 90 s working as a military photographer in 2001 gave way to the access to cameras and the drive to photographing everything in the world, including other people s artwork, gallery showings, and creative murals in all cities that one could possibly travel too. This self made publication is a small representation of the art which Travis has made through out his entire life. Illustration art from sketch book designs to computer illustrations, and poster art for underground electronic bands has been the main production focus for most of these viable illustration artworks. The idea is to show the broad range of creative works which Travis has accomplished over the past few years. To highlight these mild achievements is to recognize the hard work which has been produced so far.

A really great publication with lucid and perfect reasons. I have read through and i am confident that i am going to gonna read yet again yet again down the road. It is extremely difficult to leave it before concluding, once you begin to read the book.
